

Item description : D5.07

Manual device Spalmanetto with refillable bottle

Application system composed of a plastic bottle with specially designed nozzle which allows a precise adhesive application of 3 mm width and a thin and omogeneous layer of adhesive to achieve quick drying of the adhesive.

Complementary to the spray application, this system is perfect for precise and prompt bondings as it is connection, feeding and maintenance free.

Essential for the application of water based adhesives for the production of uppers, leather garments, boxes, albums, diaries, wallets and handbags. This practical easy to use system allows rapid refill of the plastic bottle, thus speeding up the work without any idle time.
